

Please do not permit even greater media consolidation.
Because in practice most Americans obtain news from
television, allowing greater cross-ownership will further reduce
the diversity of information available in this country.

Unless, of course, that is actually the intent and goal of this
administration, which certainly appears to be the case given
the position advocated by Mr. Powell and the other Republican
commissioners . If the FCC permits this media grab to occur,
after the intensive lobbying of the media giants, the public will
further lose confidence that this administration has any interest
in the public good.
